OBJECTIVE

Web Developer with 5+ years of experience designing, developing, and maintaining scalable web applications and enterprise systems using Node.js, Laravel, PHP, SQL, MongoDB, and cloud technologies. Experienced in REST API development, database design, cloud deployment, CI/CD, and system integration. Passionate about building secure, reliable, and high-performance backend solutions that support digital transformation in the financial services industry.

Core Technical Skills

Backend Development: [Node.js](#), [Express.js](#), Laravel, PHP, Python, Django, TypeScript, SQL

Databases: MySQL, MongoDB, Amazon DynamoDB, Firebase Realtime Database, Supabase

API & Integration: REST APIs, Third-Party API Integration, API Gateway, MQTT Protocol, LLM Integration, Retrieval-Augmented Generation (RAG), Model Context Protocol (MCP)

Cloud & Infrastructure: AWS (EC2, RDS, S3, Lambda, API Gateway, DynamoDB, Elastic Load Balancer), Google Cloud Platform (GCP), DigitalOcean, Microsoft Azure, Cloudflare Workers, Firebase

DevOps & Deployment: Docker, Kubernetes (Basic), Git, GitHub Actions, CI/CD Pipelines, Linux

Frontend Technologies: HTML5, CSS3, JavaScript (ES6+), React, [Next.js](#), Tailwind CSS, jQuery

Design & CMS: Figma, Adobe XD, WordPress, Shopify, Wix, custom wordpress plugins

SELECTED ENTERPRISE PROJECTS

Swiftshare

Address - <https://tinyurl.com/swiftshare>

SwiftShare is a chrome extension, a productivity tool designed to eliminate context-switching by turning your clipboard into a direct, lightning-fast line for sharing text, code snippets, and files (up to 25MB) directly from your browser's side panel.

Schoolsuite360

Address - <https://schoolsuite360.com>

Designed and developed a cloud-based school management platform supporting student management, attendance, examinations, payments, report generation, and analytics. Optimized backend logic and database performance while implementing scalable APIs for multiple user roles.

Controlxy

Address - <https://controlxy.com>

Designed and developed the backend for a cloud-based IoT energy monitoring and device control platform using Node.js, MongoDB, MQTT, Firebase, and Google Cloud. Built secure REST APIs, real-time device communication services, and cloud infrastructure for live energy monitoring and remote device management.

XanderTrade Inventory System

Address - <https://inventory.xandertrade.com>

Developed an enterprise inventory and fulfillment management system supporting product management, order synchronization, fulfillment workflows, returns processing, and operational reporting through scalable backend services and optimized database architecture.

Wendouble

Address - <https://app.wendouble.com.ng>

Developed a full-stack fleet management and investment platform using Laravel, React, MySQL, and GitHub Actions. Designed backend APIs, database structures, authentication mechanisms, and automated deployment pipelines to support asset tracking, logistics management, and

secure user interactions.

EXPERIENCE

Node71 Limited, Lagos, Nigeria

September, 2024 – Present

Full-stack Developer

- Design, develop, and maintain scalable web applications and enterprise backend systems using Laravel, Node.js, PHP, SQL, and cloud technologies.
- Develop RESTful APIs, backend services, authentication systems, and database-driven applications while maintaining scalable and secure software architecture.
- Integrate secure third-party APIs and enterprise services to extend business functionality and automate business processes.
- Troubleshoot production issues, optimize backend performance, improve database efficiency, and ensure application reliability.
- Monitor deployed applications, resolve production issues, and support continuous system improvements.

SchoolSuite360, Lagos, Nigeria

September, 2024 – Present

Full-Stack Developer

- Design, develop, and maintain scalable backend services powering a multi-tenant cloud-based school management platform.
- Optimize database architecture, API performance, and backend services to improve scalability, reliability, and response times.
- Build core modules, including student performance tracking, attendance management, and internal communication systems
- Implement QR code-based student attendance tracking for improved efficiency and accuracy
- Design and develop a Computer-Based Test (CBT) system supporting objective and theory-based assessments
- Optimize backend logic and database queries for performance and scalability
- Continuously improve system features based on user feedback and real-world usage
- Optimize database architecture, API performance, and backend services to improve scalability, reliability, and response times.

New Horizon Nigeria (Head Office), Lagos, Nigeria

May, 2025 - Present

Web Technology Training Specialist

- Created a new teaching curriculum now in use across all 77 centers in Nigeria.
- Delivered a lecture on AI and large language model integration for web development to instructors across 77 centers in Nigeria.
- Trained and mentored over 300 students in modern web development technologies and software engineering best practices.
- Simplified complex software engineering concepts through practical instruction and project-based learning.
- Mentored students in software development, debugging, deployment, and project delivery.
- Guiding students to confidently apply their knowledge in developing various projects of their choice.
- Offering personalized support to struggling students and those actively engaged in projects.

Xander Afritrade Ltd

January 2026 – Present

Full-Stack Developer

- Built and customized <https://XanderTrade.com>, a multi-vendor e-commerce marketplace, extending WordPress/WooCommerce beyond standard functionality to support the company's unique business model.
- **Built 4 custom plugins** - Currency Converter, Payout Manager, PromoGuard, Inventory WordPress Bridge, and XanderTrade Core Logic for multi-currency pricing, bulk vendor payouts, campaign management, reporting, marketplace automation, and custom business rules.
- Designed and developed <https://inventory.xandertrade.com>, an inventory and fulfillment system for vendor item receiving, product selection, tagging, packaging, shipping preparation, and inventory management, integrated directly with XanderTrade.
- Worked closely with the marketing and operations teams to implement third-party integrations, promotional workflows, vendor management tools, and other systems

supporting day-to-day marketplace operations.

Kcysoft Communication, Lagos, Nigeria

October 2020 - October 2024

Web Developer

- Developed backend modules for a cloud-based Human Resource Management System, including Customer Relationship Management (CRM) functionality and business workflow automation.
- Designed and implemented backend functionality for enterprise asset management, improving operational efficiency and data management.
- Set up locally an employee attendance management system with a ZKTeco biometric device.
- Designed and developed a vehicle document renewal management system supporting over 1,000 registered vehicles through efficient database design and backend automation.
- Participated in several product presentations.

Jewel Marketing Company, Virgin Islands, United States. February 2022 - November 2024

Web Developer (Freelance)

- Designed and developed responsive user and search-engine-friendly websites.
- Revamped and implemented enhancements that significantly improved functionalities and engagements.
- Fixed bugs from existing websites and implemented enhancements that significantly improved functionality and speed.
- Testing, scaling, and continuously monitoring completed projects.
- Working closely with the marketing team to ensure that products or services are efficiently promoted and well communicated to the target audience.

Code Champions Lagos

January, 2025 - May, 2025

Web Technology Instructor

- Delivered comprehensive programming knowledge to over 80 students from two schools.

- Instructed a diverse range of junior and high school students across two schools.

World Class ICT Solutions, Kogi, Nigeria

November 2023 - October 2024

Web Development and Robotics Instructor

- Teaching coding to over 50 students.
- Debugging websites.
- Designing User Interfaces with Figma.

Radisson Blu Hotel, Ikeja, Nigeria

September 2023 - October 2023

IT Support Intern

- Designed and developed a QR code generator desktop application for the hotel restaurant and bar menu to save costs.
- Set up, managed, and monitored the audiovisual equipment for meetings and events for a pleasant experience for the hotel guests.
- Participated in repairing several hotel safes, CCTV cameras, and other hotel equipment.
 - Attend to guests and staff for any ICT issues in the hotel.

Tedx Futa, Ondo, Nigeria

February 2022

Volunteer Backend Web Developer

- Integrated a payment gateway system that processed online payments for hundreds of event tickets, improving the overall efficiency of the ticket sales process.
- Worked closely with the event organizers to ensure the website met their requirements and provided a seamless user experience for ticket buyers.

TedxYabaStreet, Ondo, Nigeria

December 2022

Volunteer Backend Web Developer

- Integrated a payment gateway system that processed online payments for hundreds of event tickets, improving the overall efficiency of the ticket sales process.

PROFESSIONAL HIGHLIGHTS

- Developed multiple enterprise web applications currently in production.
- Designed scalable backend systems using Node.js, Laravel, MySQL, and MongoDB.
- Built cloud-hosted applications deployed on AWS, Google Cloud Platform, and DigitalOcean.
- Developed RESTful APIs and integrated third-party enterprise services.
- Automated deployment pipelines using GitHub Actions and Docker.
- Created a nationwide web development curriculum currently adopted across 77 training centers in Nigeria.
- Delivered AI and Large Language Model integration training to technology instructors nationwide.

AWARDS

- Academic coordinator, NIFES - 2019
- President, Living Faith Church Youth Corps, Kogi - 2024

CERTIFICATIONS

- DevOps Mastery (in view) - KodeKloud (Coursera)
- IBM Applied DevOps Engineering (in view) - IBM (Coursera)
- Scalable Deployment and DevOps for Web development (in view) - Board Infinity (Coursera)
- Software Development Process and Methodologies, 2026 - University of Minnesota (Coursera)
- Database Essentials and Vulnerabilities, 2025 - IBM (Coursera)

EDUCATION

- **B.Tech. Physics Electronics** | Federal University of Technology, Akure, Nigeria | 2021
 - Second class upper (Honours)
- **N.D. Mechanical Engineering** | The Polytechnic, Ibadan, Nigeria | 2016
